Continuation of Substance of Interview including description of the general nature of what was discussed:

Attorney Patricia Granados was informed that the amendment to the specification filed 11/22/10 is non-compliant under 37 CFR 1.121. It was conveyed that since the paragraphs in the as-filed specification are not identified by paragraph numbers, the instantly requested insertions/amendments to various parts of the specification cannot be made/entered without identification of paragraphs to be modified via identification of specific page and line numbers in the specification. Additionally, it was conveyed that the amendment requested to paragraph [0087] lacks proper markings to indicate the changes that are being made. Note that amendments to the specification, other than the claims, computer listings (37 CFR 1.96) and sequence listings (37 CFR 1.825), must be made by adding, deleting or replacing a paragraph, by replacing a section, or by a substitute specification. In order to delete, replace or add a paragraph to the specification of an application, the amendment must unambiguously identify the paragraph to be modified either by paragraph number (see MPEP § 608.01), page and line, or any other unambiguous method and be accompanied by any replacement or new paragraph(s). Replacement paragraphs must include markings to show the changes. A separate clean version of any replacement paragraphs is not required. Any new paragraphs must be presented in clean form without any markings (i.e., underlining). See MPEP 714 [R-6] 37 CFR 1.121, II. B. In order to avoid mailing out of a Notice of Non-complaint amendment, it was requested that Applicant file a supplemental amendment to correct the non-compliance by 10 a.m. on 03 January 2011.
